

# **UNION CRAFTS – BUILDING & CONSTRUCTION TRADES**

## **And**

### **CLASSIFICATION / CRAFT DEFINITIONS**

#### **Craft Classifications:**

##### **Plasterers:**

This occupation includes the application and/or repairs of finishing plaster surfaces of interior walls and ceilings and exterior stucco walls in the construction industry.

##### **Plumbers:**

This occupation includes the installation, modification and repair of utility, supply and disposal systems, fixtures, fittings and equipment such as sewage, water, gas and oil lines, compressed air, vacuum and acid systems, water closets, water heaters, hydrants, valves and pumps.

##### **Road Sprinkler Fitters:**

This occupation includes the assembly, installation and repairs on pipes, fittings and fixtures in sprinkler systems for fire prevention. Also performs other related duties.

##### **Roofers:**

This occupation includes the installation, maintenance, repair and waterproofing of all types of construction roofs.

##### **Sheet Metal Workers:**

This occupation includes the fabrication, modification, repair, assembly and installation of all sheet metal parts, items and assemblies. These metals include but are not limited to galvanized and black iron, aluminum and aluminum alloys, stainless steel, copper and brass sheets, lead alloy and bronze. Also included is sheet metal work associated with HVAC systems.

##### **Teamsters:**

This occupation includes the operation of all types of powered vehicles, some of which may be equipped with special purpose powered equipment. The vehicles are used within or between government installations, commercial and industrial facilities, or over public roads. They may be used to haul cargo or passengers or to tow equipment. This craft is also used for checking receiving materials and warehousing on industrial construction sites.

##### **Insulators:**

This occupation includes the removal of all and weather or vapor barriers asbestos related materials. The fabrication and installation of insulating materials on tanks, boilers, turbines, pumps, pipes, valves, ducts and other structures, including HVAC systems, to reduce heat loss of absorption, prevent moisture condensation, protect insulation material or reduce sound levels.

**Boilermakers:**

This occupation includes the fabrication, installation and maintenance of all types of boilers, tanks, vessels, water towers, heaters, furnaces, etc.; found in the industrial, ship building and railroad industries.

**Bricklayers/Stonemasons/Tile & Terrazzo Workers:**

These occupations include the construction, application and maintenance of all types of masonry structures of brick, block, stone, firebrick and similar materials, including the application of structural and/or glazed tile walls, ceilings, terrazzo and tiled floor.

**Carpenters:**

This occupation includes the fabrication, installation and repair of all types of wood related materials, as well as, the installation of drywall systems and acoustical tile walls and/or ceilings; and sectional scaffold building. It also includes the setting-up and dismantling of exhibits for all types of trade shows, conventions, etc.

**Cement Masons:**

This occupation includes the application and/or repair of ally types of cement and concrete surfaces and structures.

**Electricians:**

This occupation includes the manufacturing, maintenance and installation of electrical wiring systems and associated fixtures, controls, equipment and HVAC systems, including low voltage, in industrial, institutional, commercial and residential buildings.

**Elevator Constructors:**

This occupation includes the installation and maintenance of all types of elevator systems, dumbwaiters, leveling ramps, hydraulic stages and escalators.

**Floorlayers:**

This occupation includes the installation and repair of all types of carpet, linoleum and soft tile flooring.
